Topic #6----------OP-SF NET 20.2 ---------March 15, 2013

From:Sergei Suslov sergei@asu.edu
Subject: New journal "Mathematics"

[Sergei is Editor-in-Chief of the journal. –Eds.]

The new journal Mathematics is an international, open access journal which provides an advanced forum for studies related to mathematical sciences. The scope of the journal presents a very broad vision of the nature of mathematics—from practical and experimental, or intuitive, vision (Vladimir I. Arnol'd) to a highly abstract one (the Bourbaki); from Aristotle's definition of mathematics as "the science of quantity" to "Mathematics is what mathematicians do!" Serious consideration will be given to high-quality reviews, original research papers and short communications in all areas of pure and applied mathematics which are of interest to many mathematicians and scientists. There is no restriction on the length of the papers and we encourage everyone to present a full account of their research so that the results can be understood, for example by advanced graduate students. The quality of the published articles will be assured by an efficient yet rigorous peer-review process.

On behalf of the Editorial Board, I would like to extend a warm welcome to Mathematics' contributors.

Respectfully, Sergei K. Suslov
