Topics:

1. OPSFA-15 2019: 2<sup>nd</sup> call for participation
2. Announcement: Election of new SIAG/OPSF officers
3. Report on: V Orthonet Workshop by **Amparo Gil**
4. Preprints in arXiv.org
5. Submitting contributions to OP-SF NET and SIAM-OPSF (OP-SF Talk)
6. Thought of the Month by **Aristotle**

## Calendar of Events:

### May 27–29, 2019

Recent Advances in Scientific Computation

On the 25<sup>th</sup> anniversary of the Electronic Transactions on Numerical Analysis (ETNA)

Santa Margherita di Pula outside Cagliari, Sardinia, Italy

<http://bugs.unica.it/ETNA25/>

### June 16–20, 2019

Elliptic integrable systems, special functions and quantum field theory

Nordic Institute for Theoretical Physics (**NORDITA**), Stockholm, Sweden

<http://www.nordita.org/elliptic2019>

### July 15–19, 2019

[International Congress on Industrial and Applied Mathematics \(ICIAM 2019\)](#)

Minisymposium on “Multivariate Orthogonal Polynomials: Theory and Applications”,

Organized by Paco Marcellán, Maite Pérez and Yuan Xu,

Minisymposium on “Integrable systems and discrete dynamics”,

Organized by Nalini Joshi, David Gómez-Ullate Oteiza and Nobutaka Nakazono,

Campus de Blasco Ibáñez, Universitat de València, València, Spain

<https://iciam2019.org>

### July 22–26, 2019

International Symposium on Orthogonal Polynomials, Special Functions & Applications (OPSFA–15)

RISC, Johannes Kepler University, Linz, Austria

<http://www.risc.jku.at/conferences/opsfa2019/>

### September 1–7, 2019

[The 2<sup>nd</sup> International Conference on Symmetry](#)

Special Session on “Special Functions and Orthogonal Polynomials”,

Organized by Howard S. Cohl and Roberto S. Costas–Santos,

[Centro de Ciencias de Benasque Pedro Pascual](#), Benasque, Spain

<http://benasque.org/2019symmetry>

### September 14–15, 2019

AMS Fall Central Sectional Meeting

Special Session on “Special Functions and Orthogonal Polynomials”

University of Wisconsin–Madison, Madison, Wisconsin, USA

[http://www.ams.org/meetings/sectional/2267\\_program.html](http://www.ams.org/meetings/sectional/2267_program.html)

### July 6–10, 2020

SIAM Annual Meeting, held jointly with CAIMS

(Canadian Applied and Industrial Mathematics Society)

Sheraton Centre Toronto Hotel, Toronto, Ontario, Canada

<https://www.siam.org/Conferences/CM/Main/an20>

### July 13–17, 2020

33<sup>rd</sup> International Colloquium on Group Theoretical Methods in Physics (Group33)

Cotonou, Benin

<http://www.cipma.net/group33-cotonou-benin>

Topic #1 ——— OP – SF Net 26.3 ——— May 15, 2019

From: Christoph Koutschan ([christoph.koutschan@ricam.oeaw.ac.at](mailto:christoph.koutschan@ricam.oeaw.ac.at))

Subject: OPSFA–15 2019: 2<sup>nd</sup> call for participation

OPSFA–15 2019: 2<sup>nd</sup> Call for Participation.

Registration is open.

The 15<sup>th</sup> International Symposium on Orthogonal Polynomials, Special Functions and Applications, RISC, Johannes Kepler University, Hagenberg (Linz), Austria, July 22 – 26, 2019

<https://www3.risc.jku.at/conferences/opsfa2019/>

#### Important deadlines:

- 15.05.2019: title and abstract submission for talks
- 15.05.2019: submission of posters
- 30.06.2019: early bird registration

The 15<sup>th</sup> [Symposium on Orthogonal Polynomials and Special Functions and Applications](#) (OPSFA–15) will take place from July 22 to July 26, 2019, in Hagenberg, Austria. It is organized by the [Research Institute for Symbolic Computation](#) (RISC). The conference

venue is on the campus of the University of Applied Sciences in Hagenberg. Hagenberg im Muehlkreis is a small town in Upper Austria, surrounded by green hills and located halfway between Salzburg and Vienna. All interested colleagues are cordially invited to attend this meeting.

The conference features plenary lectures given by:

- Thomas Bothner (King's College London, UK)
- Peter Clarkson (University of Kent, UK)
- Christian Krattenthaler (University of Vienna, Austria)
- Irina Nenciu (University of Illinois at Chicago, USA)
- Veronika Pillwein (Johannes Kepler University, Linz, Austria)
- Mikhail Sodin (Tel Aviv University, Israel)
- Alan Sokal (New York University, USA)
- Armin Straub (University of South Alabama, USA)
- Luc Vinet (University of Montreal, Canada)

The contributed talks will be organized in topical sessions (mini-symposia). If you are interested in giving a talk, please refer to the list of mini-symposia on the website and check to see which topic fits best; then get into contact with the respective mini-symposium organizers. If none of the topics are suitable, the talk can be presented in the general session for contributed talks. In addition, posters are accepted for display at the meeting. In both cases, please contact the conference chair.

The early registration fee (until June 30) is 300 EUR. A reduced registration fee of 190 EUR is available for students and for participants from developing countries. The registration fee covers all lunches, coffee breaks, and a welcome reception on Sunday evening (July 21). It also includes an excursion on Wednesday afternoon to the lovely medieval city of Freistadt, and the conference dinner. Moreover, a complimentary shuttle service is provided from the Linz airport / Linz train station to the conference hotel on Sunday (July 21), and in the opposite direction on Friday afternoon (July 26) and Saturday morning (July 27). Accommodation can be booked via the conference registration form at a rate of 44 EUR per night in a single room, including breakfast, but payment is done directly at the hotel upon checkout. The hotel is in walking distance to the lecture rooms.

The (post-) proceedings of this OPSFA conference will appear as a special issue in [Integral Transforms and Special Functions](#). The guest editors are Walter van Assche, Galina Filipuk, Christoph Koutschan, and Francisco Marcellán. Further details will be announced during the conference.

Conferences in the OPSFA series provide a forum for mathematicians, physicists, and computational scientists to communicate recent research results in the areas of orthogonal polynomials and special functions.

Scientific Committee:

- Walter van Assche (University of Leuven, Belgium)
- Diego Dominici (State University of New York, New Paltz, USA)
- Kathy Driver (University of Cape Town, South Africa)
- Galina Filipuk (University of Warsaw, Poland)
- Frank Garvan (University of Florida, Gainesville, USA)
- Mourad Ismail (University of Central Florida, Orlando, USA)
- Doron Lubinsky (Georgia Institute of Technology, Atlanta, USA)
- Zeinab Mansour (Cairo University, Egypt)

- Francisco Marcellán (University Carlos III, Madrid, Spain)
- Bruno Salvy (Ecole Normale Supérieure, Lyon, France)
- Michael Schlosser (University of Vienna, Austria)
- Thomas Trogdon (University of California, Irvine, USA)

Organizing Committee:

- Christoph Koutschan (RICAM, Austrian Academy of Sciences, Austria)
- Peter Paule (RISC, Johannes Kepler University Linz, Austria)

The symposium is an event of the SIAM Activity Group on Orthogonal Polynomials and Special Functions. The activity group promotes basic research in orthogonal polynomials and special functions, as well as applications of this subject in other parts of mathematics, and in science and industry. It encourages and supports the exchange of information, ideas, and techniques between workers in this field and other mathematicians and scientists. The activity group also awards the Gábor Szegő Prize every two years to an early-career researcher for outstanding research contributions in the area of orthogonal polynomials and special functions.

Topic #2      ——— OP – SF Net 26.3      ——— May 15, 2019

From: Walter van Assche ([walter.vanassche@kuleuven.be](mailto:walter.vanassche@kuleuven.be))  
 Subject: Announcement: Election of new SIAG/OPSF officers

The term of the present officers of the SIAM activity group “Orthogonal Polynomials and Special Functions” (SIAG/OPSF) will end December 31, 2019.

New officers have to be elected and in order to nominate candidates for the available offices, a nominating committee has been formed, which was approved by the SIAM Vice President at Large. The nominating committee consists of Kathy Driver, Tom Koornwinder, Francisco Marcellán, Sarah Post and Yuan Xu.

The elected officer positions for which nominations are needed are:

- Chair
- Vice Chair
- Program Director
- Secretary

Descriptions and responsibilities for each position can be found at the following [link](#).

Please send all suggestions and nominations for one of the new officers to the nominating committee. The timing for the elections is as follows:

1. Nominees should be identified by June 30 and approved by August 1;
2. Ballots will be posted online and the elections will start on September 1;
3. The election is completed on November 30;
4. The new officers will start on January 1.

These dates may still change somewhat and should only be considered as a guiding line.

It was (and still is) my pleasure to serve as your chair for the past six years. I will not be running for office again but hope to see many of you at the upcoming OPSFA-15 conference in Hagenberg, Austria (July 22–26).

From: Amparo Gil ([amparo.gil@unican.es](mailto:amparo.gil@unican.es))

Subject: Report on: V Orthonet Workshop by **Amparo Gil**

The V Congress of the Spanish Network on Orthogonal Polynomials and Special Functions (**Orthonet**) took place in Pamplona (Spain). The legend states that San Fermín was the first bishop of Pamplona and baptized 40,000 pagans in three days. The organizers (Blanca Bujanda, Chelo Ferreira, José Luis Lopez, Pedro Pagola, Pablo Palacios and Ester Pérez-Sinusía) took a more efficient approach and concentrated the workshop in just two days (28–29 March.)

On the first day, the program included plenary talks by Nico Temme (Numerical evaluation of Airy-type integrals arising in uniform asymptotic analysis), María José Cantero (Sobolev inner product as a solution of inverse Darboux transformation) and myself (Computational Methods for Cumulative Distribution Functions). A junior talk by Alberto Arenas marked the end of the scientific program for the day. The evening was devoted to social activities: a guided tour to the beautiful old town and a dinner in a typical restaurant.

The second day had a plenary talk by Antonio Durán (Orthogonality and bispectrality) and three junior conferences by Misael Enrique Marriaga, Irene Valero and Juan Carlos García. There were also an open problems session (chaired by Renato Álvarez-Nodarse), a poster session and a meeting (organized by Oscar Ciaurri) of the PI's of the research groups forming the network. The social activities of the day included a walk along the bank of the Arga River and a “musicata” (a combination of music and wine tasting) which was very successful.

The organizers did a superb job running this conference and we all had excellent opportunities for discussion. Many thanks for their hospitality.

Figure 1: Orthonet V group picture.

From: OP–SF Net Editors  
Subject: Preprints in arXiv.org

The following preprints related to the fields of orthogonal polynomials and special functions were posted or cross-listed to one of the subcategories of arXiv.org during March and April 2019. This list has been separated into two categories.

### **OP–SF Net Subscriber E–Prints**

<http://arxiv.org/abs/1903.00054>

On a property of random walk polynomials involving Christoffel functions  
Erik A. van Doorn, Ryszard Szwarc

<http://arxiv.org/abs/1903.00144>

Signal processing, orthogonal polynomials, and Heun equations  
Geoffroy Bergeron, Luc Vinet, Alexei Zhedanov

<http://arxiv.org/abs/1903.00145>

Spin Chains, Graphs and State Revival  
Hiroshi Miki, Satoshi Tsujimoto, Luc Vinet

<http://arxiv.org/abs/1903.00867>

Solutions of convex Bethe Ansatz equations and the zeros of (basic) hypergeometric orthogonal polynomials  
J. F. van Diejen, E. Emsiz

<http://arxiv.org/abs/1903.00960>

Supercritical Regime for the Kissing Polynomials  
Andrew F. Celsus, Guilherme L. F. Silva

<http://arxiv.org/abs/1903.01827>

Bispectral dual difference equations for the quantum Toda chain with boundary perturbations  
J. F. van Diejen, E. Emsiz

<http://arxiv.org/abs/1903.02421>

Higher Order Quantum Superintegrability: a new “Painlevé conjecture”  
Ian Marquette, Pavel Winternitz

<http://arxiv.org/abs/1903.03708>

A Detailed Analysis of Quicksort Running Time  
Shalosh B. Ekhad, Doron Zeilberger

<http://arxiv.org/abs/1903.03766>

Some congruences related to a congruence of Van Hamme  
Victor J. W. Guo, Ji–Cai Liu

<http://arxiv.org/abs/1903.03897>

Sharp Bounds for the Arc Lemniscate Sine Function  
Horst Alzer, Man Kam Kwong

<http://arxiv.org/abs/1903.04136>

Some identities of special numbers and polynomials arising from  $p$ -adic integrals on  $\mathbb{Z}_p$   
Dae San Kim, Han Young Kim, Sung-Soo Pyo, Taekyun Kim

<http://arxiv.org/abs/1903.05622>

De Branges canonical systems with finite logarithmic integral  
Roman Bessonov, Sergey Denisov

<http://arxiv.org/abs/1903.05674>

Truncation of the reflection algebra and the Hahn algebra  
Nicolas Crampe, Eric Ragoucy, Luc Vinet, Alexei Zhedanov

<http://arxiv.org/abs/1903.06642>

Real Zeros of Random Sums with I.I.D. Coefficients  
Aaron M. Yeager

<http://arxiv.org/abs/1903.06826>

A Universality Law For Sign Correlations of Eigenfunctions of Differential Operators  
Felipe Gonçalves, Diogo Oliveira e Silva, Stefan Steinerberger

<http://arxiv.org/abs/1903.07215>

Analytic Continuation for Multiple Zeta Values using Symbolic Representations  
Lin Jiu, Tanay Wakhare, Christophe Vignat

<http://arxiv.org/abs/1903.07494>

Quantum walks: Schur functions meet symmetry protected topological phases  
C. Cedzich, T. Geib, F. A. Grünbaum, L. Velázquez, A. H. Werner, R. F. Werner

<http://arxiv.org/abs/1903.07574>

A family of entire functions connecting the Bessel function  $J_1$  and the Lambert  $W$  function  
Christian Berg, Eugenio Massa, Ana P. Peron

<http://arxiv.org/abs/1903.08304>

Riemann–Hilbert Problems  
Percy Deift

<http://arxiv.org/abs/1903.08487>

On integrals involving quotients of hyperbolic functions  
S. A. Dar, R. B. Paris

Topic #5 ——— OP – SF Net 26.3 ——— May 15, 2019

From: OP–SF Net Editors

Subject: Submitting contributions to OP–SF NET and SIAM–OPSF (OP–SF Talk)

To contribute a news item to OP–SF NET, send e–mail to one of the OP–SF Editors  
[howard.cohl@nist.gov](mailto:howard.cohl@nist.gov), or [spost@hawaii.edu](mailto:spost@hawaii.edu).

Contributions to OP–SF NET 26.4 should be sent by July 1, 2019.

OP–SF NET is an electronic newsletter of the SIAM Activity Group on Special Functions and Orthogonal Polynomials. We disseminate your contributions on anything of interest to the special functions and orthogonal polynomials community. This includes announcements of conferences, forthcoming books, new software, electronic archives, research questions, and job openings as well as news about new appointments, promotions, research visitors, awards and prizes. OP–SF Net is transmitted periodically through a post to SIAM–OPSF (OP–SF Talk).

SIAM–OPSF (OP–SF Talk) is a listserv of the SIAM Activity Group on Special Functions and Orthogonal Polynomials, which facilitates communication among members, and friends of the Activity Group. See the previous Topic. To post an item to the listserv, send e–mail to [siam-opsf@siam.org](mailto:siam-opsf@siam.org).

WWW home page of this Activity Group:

<http://math.nist.gov/opsf>

Information on joining SIAM and this activity group: [service@siam.org](mailto:service@siam.org)

The elected Officers of the Activity Group (2017–2019) are:

Walter Van Assche, Chair  
Andrei Martínez–Finkelshtein, Vice Chair  
Sarah Post, Program Director  
Yuan Xu, Secretary

The appointed officers are:

Howard Cohl, OP–SF NET co–editor  
Sarah Post, OP–SF NET co–editor  
Diego Dominici, OP–SF Talk moderator  
Bonita Saunders, Webmaster and OP–SF Talk moderator

Topic #6 ——— OP – SF Net 26.3 ——— May 15, 2019

From: OP-SF Net Editors

Subject: Thought of the Month by **Aristotle**

The mathematical sciences particularly exhibit order, symmetry, and limitation; and these are the greatest forms of the beautiful.

**Aristotle** (384–322 BC), *Metaphysica* Δ, *Corpus Aristotelicum*, 3–1078b.
